

A large graphic at the top of the slide features the word "network" in a large, stylized, yellow-outlined font. Below it, the words "enterprise europe" are written in a smaller, white, sans-serif font. The background is orange with several circular diagrams containing red and white dots connected by lines, suggesting a network or orbital paths.

network enterprise europe

Enterprise Europe Network

Luísa Bernardes
Countdown to Horizon 2020 Space
Lisboa, 31-01-2014

54 countries
+680 organisations

Our Network's 4 missions

1) EU legislation & funding

*Informing you about European programmes
and assisting you in applying for EU grants*

A person wearing a black jumpsuit is hanging upside down from a ceiling in a server room. The person's arms are extended downwards, and their legs are straight out. The room has a white ceiling with square light fixtures and a wall with several doors or panels. The text "2) Find research/EU calls partners" is overlaid on the image.

2) Find research/EU calls partners

*Supporting your partner search for
cooperative research projects at
transnational level*

3) Find commercial partners

4) Find technology partners

Finding innovative technological solutions to complement your product development
Promoting your innovative technologies and in our database of technology profiles

The screenshot shows the Enterprise Europe Network website in a Mozilla Firefox browser window. The browser's address bar displays the URL www.enterpriseeuropenetwork.pt/Paginas/default.aspx. The website's header features the Enterprise Europe Network logo and a navigation menu with links such as 'Destaques', 'Notícias', 'Eventos', 'Informação Temática', 'Bases de Dados', 'Contactos', 'Newsletters', 'English', and 'My Enterprise Europe Network'. The main content area is divided into three sections: 'Informação Temática' with a grid of six images, 'Destaque' featuring a 'Mission for Growth 2014' announcement from Wallonia, Belgium, and 'Notícias' with a list of recent news items. A 'Convites em Aberto' section is also present, encouraging users to register for events. The footer includes logos for various partner organizations and a statement that the project is co-financed by the European Commission.

Technology Request

Details

Title:	Request for advanced skills in manufacturing aeronautical device or wing turbine products in composite
POD Reference:	13 FR 38m5 3SLV
Summary:	<p>A French company invented worldwide patented devices aiming at reducing induced drag and vortex on wing tips.</p> <p>The company is looking for a specialist in composite – Manufacturer of molds pieces in composite having specific knowledge in products for the aeronautic and wind turbines. They are looking for licensing agreement, manufacturing agreement and/or Commercial Agreement with Technical Assistance.</p>
Description:	<p>A French company specialised in R&D for the aeronautics sector invented worldwide patented devices aiming at reducing induced drag and vortex on wing tips. They are looking for a specialist with specific skills in composite and used to work for the aeronautics or wind power sector. This specialist would manufacture the devices and the molds.</p> <p>The French company considers cooperation under licensing agreement, manufacturing agreement and/or Commercial Agreement with Technical Assistance.</p> <p>Technical Specifications / Specific technical requirements:</p> <p>The partner sought must have the ability to manufacture:</p> <p>1/ The new device in composite (carbone fiber, fiber glass, Kevlar carbone fiber, etc...) for aeronautical and wind turbines;</p> <p>2/ The moulds</p> <p>These devices must be adaptable in all profiles wing tips aircrafts and wing tips blades wind turbines or other applications</p> <p>Current and Potential Domain of Application: All wind turbines at vertical and horizontal rotor</p> <p>All aircrafts and Unnamed Aerial Vehicles (Real test have been done with light aircraft)</p> <p>Many other applications into ground, air and sea.</p>

Technical Specification or Expertise Sought:

The aim of the research is first to develop and validate an improved numerical model for the simulation of the near wake occurring downstream a wing, the near wake breakdown and the formation of the two counter rotating vortices. Next, based on the results of the numerical simulations a simplified mathematical model of the far wake is developed and validated for the use for Air Traffic Management and for air traffic optimization purposes.

Technology Request

Keywords

Technology Keywords:

001002013 Information Technology/Informatics
001002016 Simulation
002010001 Aeronautical technology / Avionics
002010002 Aircraft

Partner Sought

Type and Role of Partner Sought:

- Type of partner sought: Research entity
- Specific area of activity of the partner: Transport, Information gathering and services
- Task to be performed by the partner sought: Joint research and technical cooperation to develop and validate an improved numerical model for the simulation of the near wake occurring downstream a wing, the near wake breakdown and the formation of the two counter rotating vortices.

Type of Partnership Considered:

Technical cooperation agreement

Client

	<p>thicknesses from 0.5mm to 0.1mm.</p> <p>The company wishes to offer itself as a UK distributor to companies with complimentary products to its range in order to build on its experience as a distributor for a number of other European partners, stocking and distributing products relating to:</p> <ul style="list-style-type: none">- plastic encoder disks & scales,- silicon PIN diodes, emitters & detectors,- opto ASIC (Application-Specific Integrated Circuit laser drivers, encoders),- polymer fibre optic components & tools,- sensors & emitters & packaging,- peltier effect & high power, thermoelectric coolers- precision plastic laser lenses- glass encoder disks, reticles & scales <p>The company will also consider reciprocal distribution agreement with the right partner, e.g. a manufacturer / distributor of similar and complementary products.</p>
Advantages and Innovations:	<p>The company is an established UK & European distributor for a range of equipment and manufacturing companies and supplies into an existing supply chain, offering companies opportunities to access the large UK market.</p> <p>Current customers include manufacturers of encoder products, medical equipment, security equipment, measurement & communications products, research & aerospace, transport products and process & machinery controls.</p> <p>It offers potential distributors access to a wider product range to generate new sales and market opportunities.</p>

Standard questions

What kind of cooperation are you looking for? *

Please indicate what you can offer to other organisations/companies to help them further their activities and/or what you would like to gain in order to further your organisation/company activity. (Max. 600 characters)

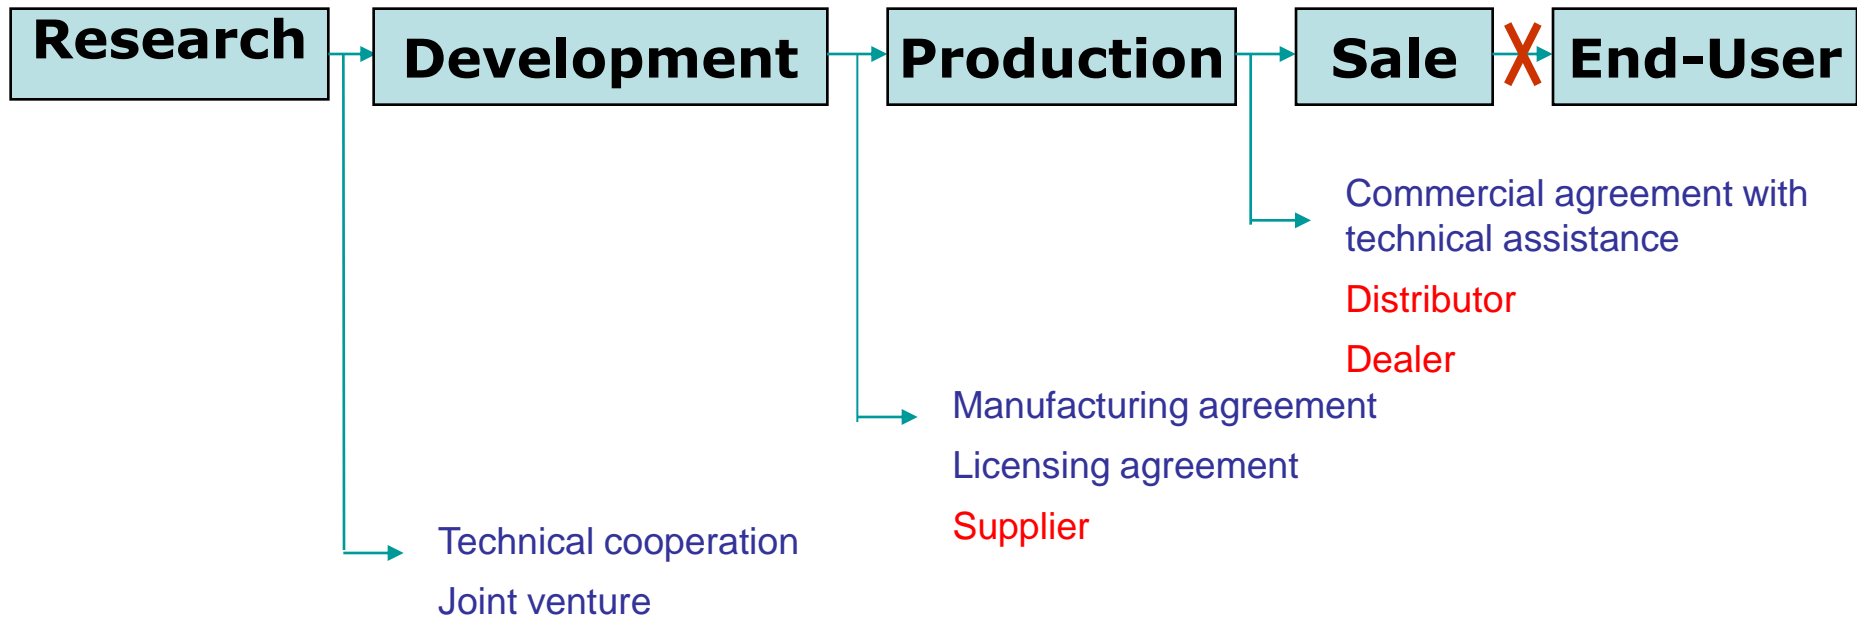

Which information is missing or unclear? *

Please provide detailed information about what is missing or unclear from the profile that you would like to make an expression of interest for. You will receive much faster feedback and improved your chances of securing an agreement with the more information that you provide. (Max. 600 characters)

Some facts about your company *

Please include any supporting information about your company. Include information such as: Type of your organisation, year founded, size and if you are already
