Olisipo

Company Overview

Olisipo 20 Anos

Founded in 1994, Olisipo has consistently evolved a front-line approach to **Human Resources Management**, introducing an efficient and more demanding selection process that ensures the recruitment of "talents" and candidates with excellent growth potential, guaranteeing a reliable service that surpasses our Client's expectations.

However, it is mainly through close **monitoring and evaluation of our specialist's performance** on the field, as well as ensuring the implementation of customized **training plans**, that Olisipo has achieved a performance-driven framework. We also built a Strategic **Human Capital Management** model, with an integrated and methodological Competency Model.

Olisipo DNA

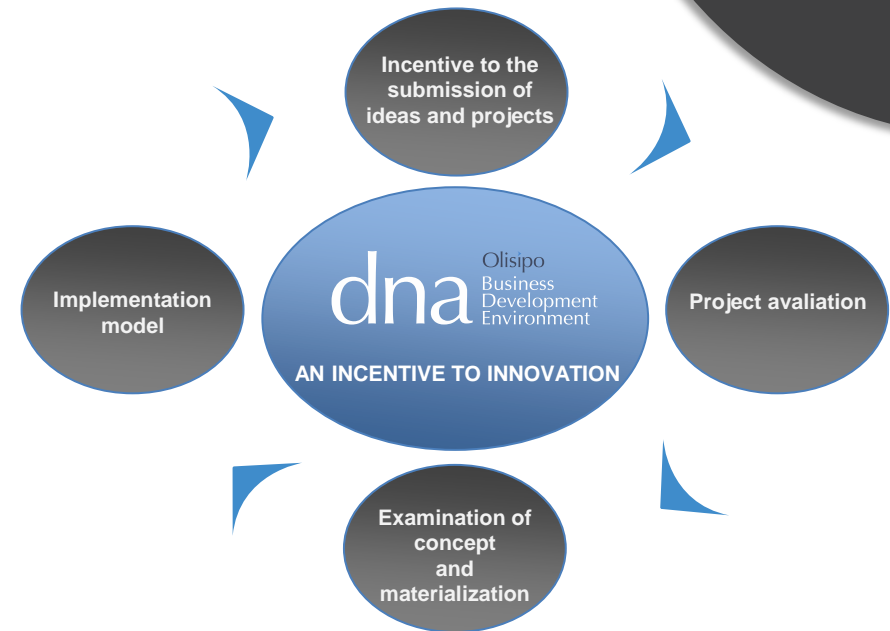

Innovation & Entrepreneurship

Olisipo DNA – Business Development Environment

Startup Incubation
Innovative Products & Solutions
New Business Opportunities
Market Differentiation

Olisipo DNA Companies:

EyeSee: Next Generation Advertising
True Kare: Remote Senior Health Support
SenseFinity: Internet of Things

Olisipo is focused in becoming a
Globally Recognized Center for Innovation and Excellence!

Smart Energy Solution is an Olisipo's key innovation area!

Novel concept for smart energy management!

**Autonomous intelligent management layer,
based on energy storage in distribution network,
leading the change towards a secure, cleaner and efficient energy.**

Smart Energy Management

Energy supply and demand balance by load shifting and peak leveling

Renewable energy production efficiency increase

Spinning reserve costs reduction

Distribution network loss minimization

Grid reliability enhancement by improving fault tolerance
