

Clean Sky 2 and Synergies with PT2020
Information Day
3 February 2017, Lisbon

Dr. Christos Vasilakos
Policy Officer – Synergies with ESIF

Funding Breakdown to date – CPW01-03

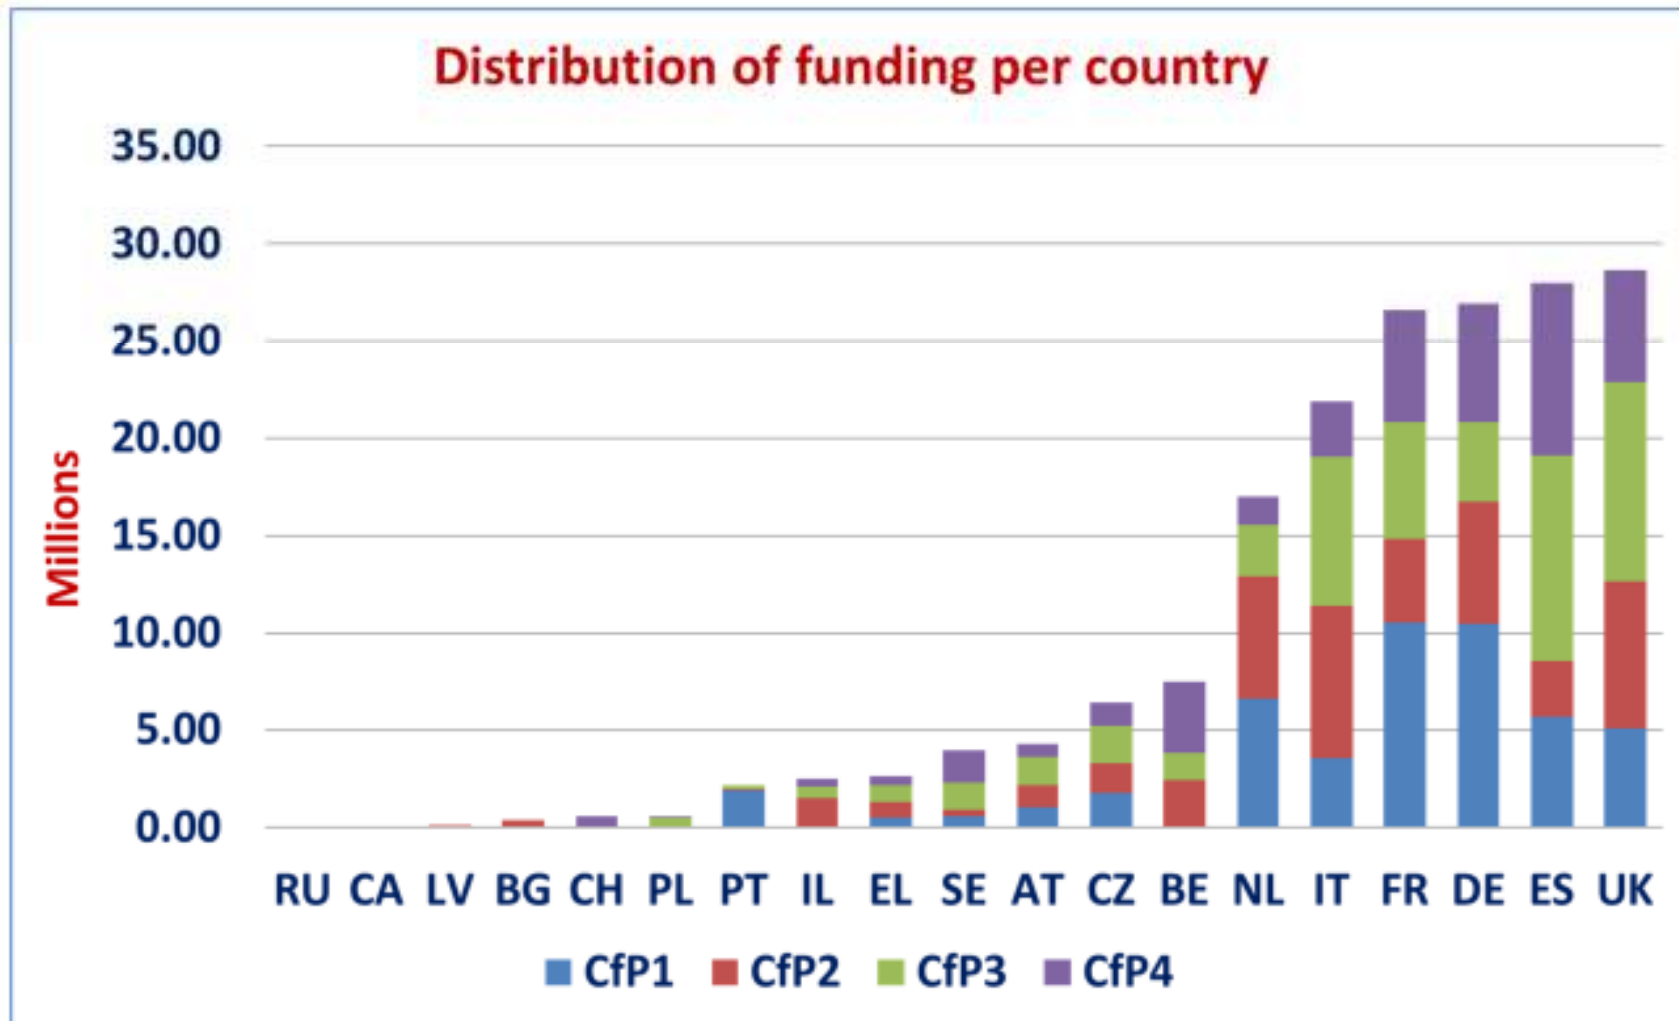

Distribution of funding per country

The graph is showing the post-evaluation values. Eligibility will be subject to H2020 rules

Funding Breakdown to date – CfP01-04

All CfP04 data preliminary and subject to GB adoption of Ranking Lists

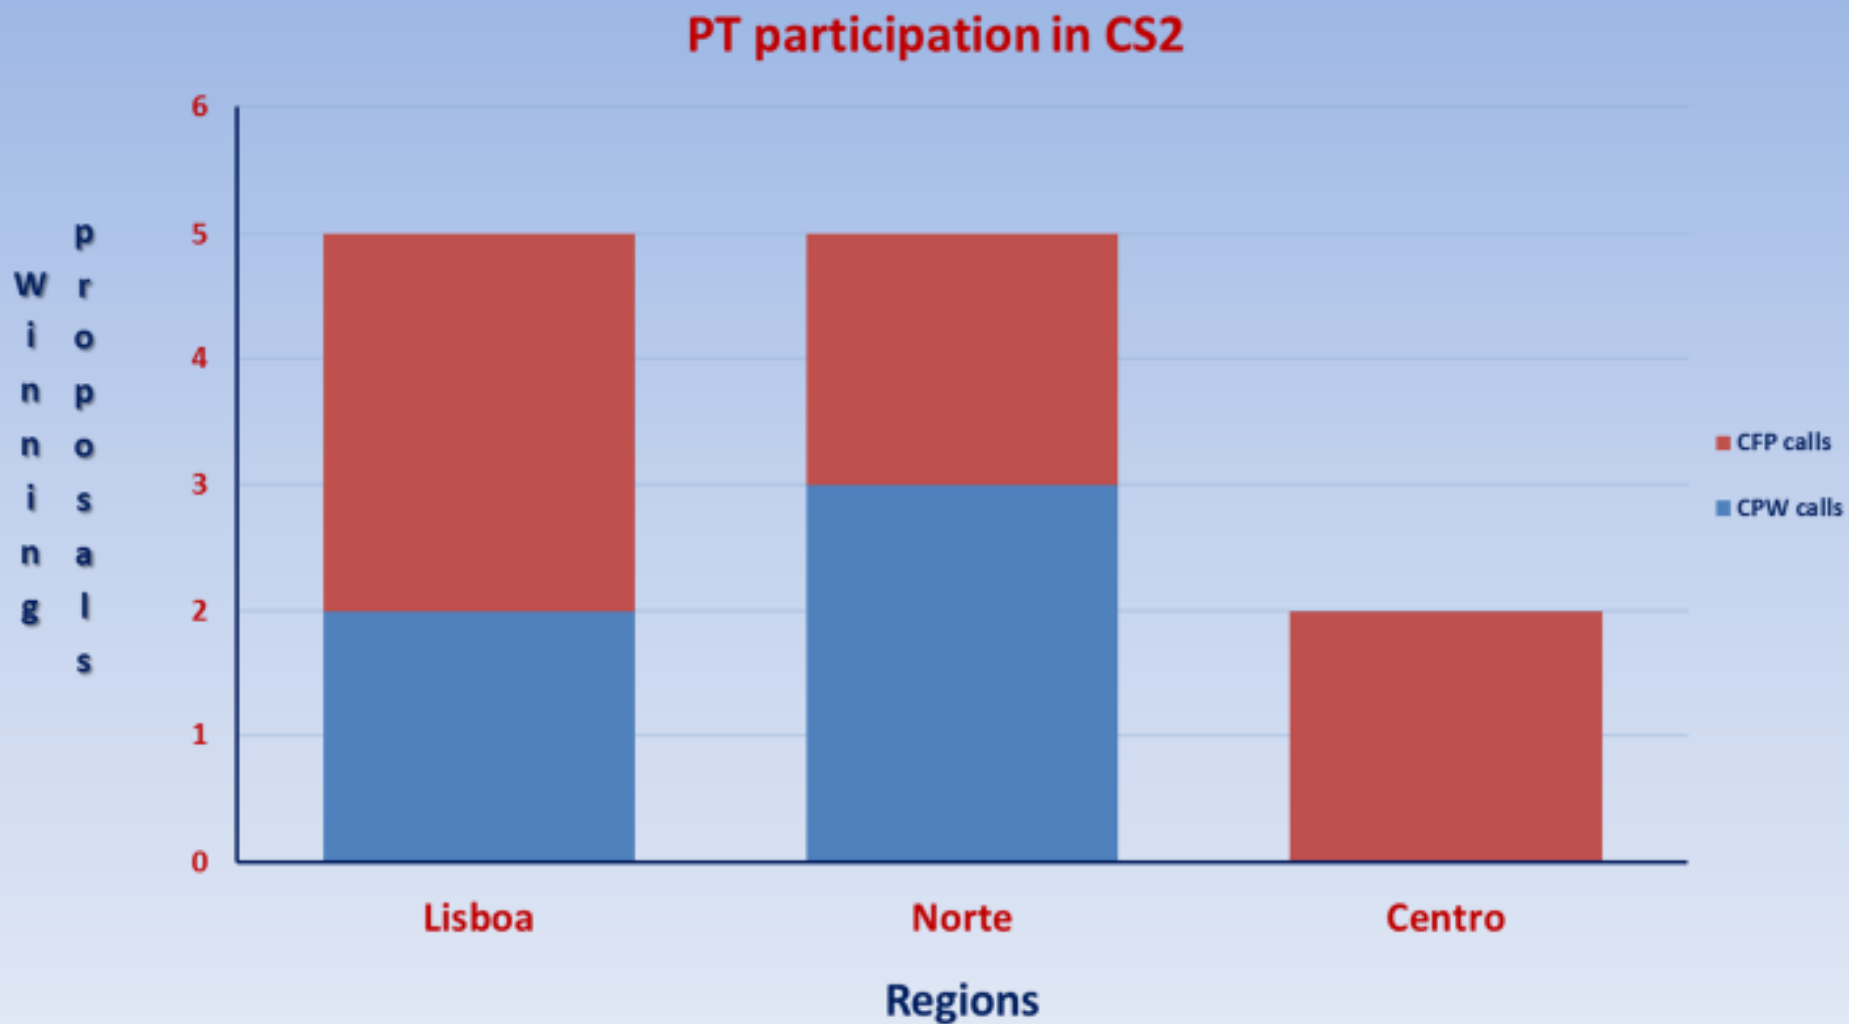

* Note case of CH *requested funding*. EU funding eligibility will be subject to H2020 rules

PT Beneficiaries in CS 2

CallRef	Participant Role	Participant Legal Name	Applicant region Code	Appl Main Pers Email	Appl First Name	Appl Last Name
CFP01	Coordinator	Active Space Technologies, Actividades Aeroespaciais S.A.	Centro	abel.mendes@activespacetech.com	Abel	Mendes
CFP01	Participant	INSTITUTO DE SOLDADURA E QUALIDADE	Lisbon	mmpinto@isq.pt	Margarida	Pinto

PT participation in CS 2

PT funding in CS 2

Distribution of funding per Region

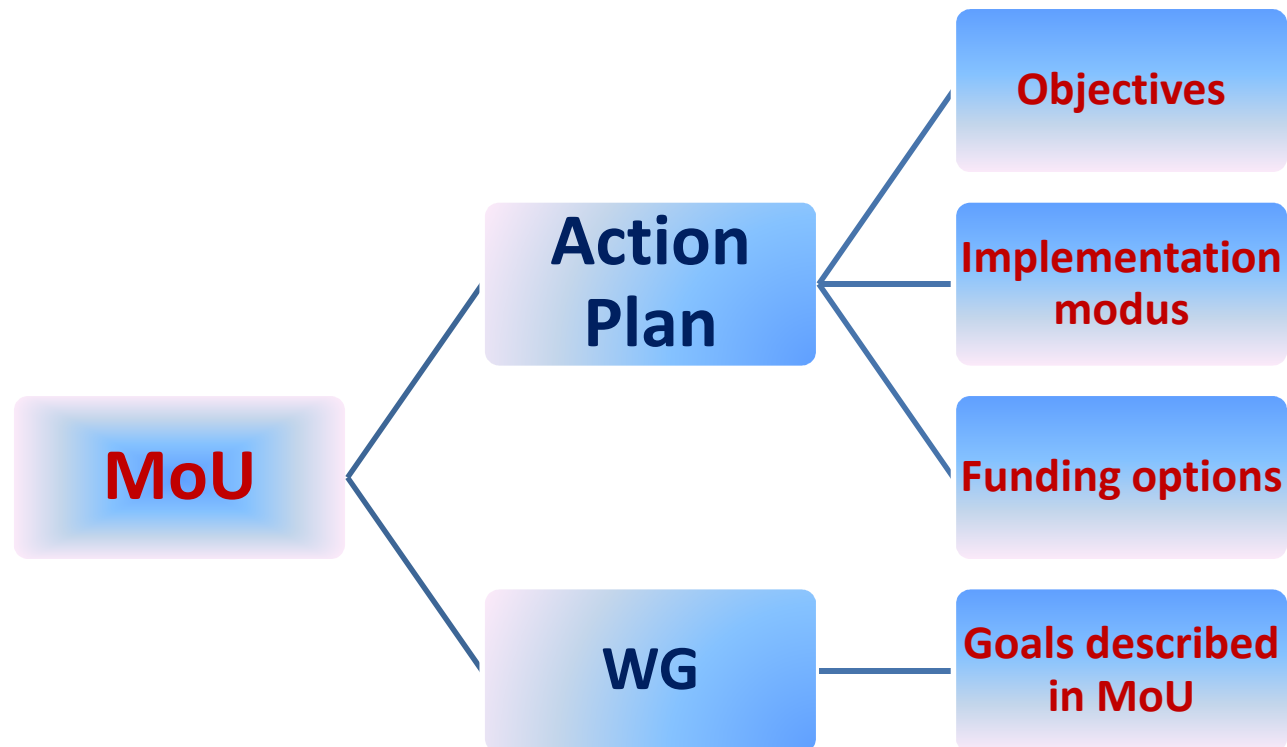

MoU Implementation (I)

- In the context of the **MoU** both parties:
 - ✓ have committed in working together to promote and foster cooperation,
 - ✓ to identify common priorities and possible synergies between their own Programmes and relevant available financial instruments respectively at European and national/regional levels
- The goal of this **MoU** is to identify specific areas of synergy and complementarity for cooperative research or pilot demonstration activities, under PT2020 and Clean Sky 2.
- Activities can either complement previous or running CSJU funded activities or sustain precursor phases of future planned CLEAN SKY 2 activities.
- The MoU should be kept at a more strategic and programmatic level; however it could also be used as a political tool
- An opportunity for a strategic document mapping of PT capabilities, as a first basis for a future National Aerospace Strategy

MoU Implementation (II)

- ✓ Taking into account that Aeronautics is included in RIS3 priorities and given an ESIF budget of almost **2 b€ for R&I** activities, you can build on complementarities and synergies with CSJU, through the implementation of the bilateral MoU

MoU Implementation - WG Goals

- ✓ To propose a Cooperation Strategy between Portugal and the CSJU, to be implemented either through collaborative research or pilot projects executed nationally and/or regionally;
- ✓ To Identify complementarities and synergies between both parties' financing instruments, namely CLEAN SKY 2 funds (H2020) and Portuguese Structural Funds (PT2020) in compliance with their own framework and applicable rules;
- ✓ To explore the possibilities offered by current incentives under PT2020, namely "Collaborative R&D projects", "Mobilizing projects" and "Demonstrators and Pilot Line projects" to foster synergies with Clean Sky;
- ✓ To propose future PT2020 funding schemes, to allow for a better match with the objectives of the Cooperation Strategy defined in paragraph i), including the possibility of launching Clean Sky 2 thematic calls;
- ✓ To promote the participation of Portuguese entities in the "General Forum" organized by the CSJU and in national and international aeronautical events;
- ✓ To exchange on the evolution of the Portuguese participation in support programs for aeronautics under H2020 and PT2020;
- ✓ To share information and experiences on a regular basis;
- ✓ To promote the dissemination of relevant information to assess the performance of ESIF instruments used under this memorandum and their achievements. Multiple channels can be used, such as websites, newsletters and communication channels at disposal.

How to engage in cooperation with the CSJU

- In order to enhance the synergies with ESIF, CSJU provides a “**Guidance note**” on how to include in the Calls for Proposal, complementary activities which may be supported by European Structural and Investment Funds (ESIF).
- Core Partners and/or Partners to CSJU are encouraged to introduce complementary activities, funded or eligible for support through ESIF, that are in synergy/complementarity with the JU funded project/activities under implementation, topic area and/or contribute to the objectives of the Clean Sky 2 Programme.
- In both cases, these activities shall be presented under a separate Work Package (**ESIF WP**) linking to the proposal or to the CSJU selected project that clearly indicates ESIF and the relevant national/regional funding scheme/call or ESIF Operational Programme as the possible source of public funding.
