

Índice de Desempenho na Excelência de Investigação (IDEI)

High Performing e Low Performing

O IDEI resulta da análise de 4 variáveis

- *The share of highly cited publications in all publications where at least one of the authors has an affiliation in a given country;*
- *Number of top scientific universities and public research organizations in a country divided by million population;*
- *Patent applications per million population;*
- *Total value of ERC grants received divided by public R&D performed by the higher education and government sectors.*
